

Frazer Sparham  
BA Graphics & Communication Design (Ind)  
Erasmus+ Work place student 2015-2016  
Worked at Momkai in Amsterdam, Netherlands

On my course, we have the option to do either a Year in Industry or Study Abroad before our final year of the course. During my Year in Industry I decided to spend 7 months in the digital agency, Momkai, out in Amsterdam after doing my first 6 months in a branding agency in Leeds. For my field, experience of working within a professional setting is second only to the work we produce once we leave university, which is why it's very important to take internships and the Erasmus funding definitely helped. My Erasmus experience was fantastic, not only was I able to live and be a part of a different working culture, with some tasks being done completely differently to over here, but I was opened to far more cultures by meeting many people from different backgrounds as I lived abroad. What I'd say to anyone else contemplating whether they can work and live abroad, is just do it, don't think, you'll probably not get this chance again with such a safety net as Erasmus to help.
